Subject Index

A

Advanced pecorans, chromosome conservation among 204–210
African elephant, structure and history of 100–104
Agouti locus 271–272
Alfalfa 18–22
Alleles
  agouti locus 271–272
  in Austrian cats 139–142
  of cat coat genes 86–91
  cotton 38–39
American chestnut 440–446
American racism 497–498
Anther tapetal cells, of *Vigna unguiculata* (L.) Walp 43–46
Antilocapridae. *See* Pronghorn
Apomictic tetraploid, early pollination of 295–297
Apple, modular marker linkage map for 4–11
Ascocenda orchids 40–43
Asteraceae 171–173
Ateles paniscus chamek. *See* Spider monkey
Austrian cats, alleles in 139–142

B

Balding, mouse chromosome 18 mutation 134–136
Barley 451–454
Bean. *See* Common bean; Field bean; Tepary bean
Beech nut seeds, natural selection in 183–190
Beta carotene, in wild tomato 401–404
Biology, foundations of modern 69
Black rhinoceros, genetic variation in 261–266
Black wildebeest 479–483
Blue wildebeest 479–483
Borek 12–17
Bossier 484–486
Bovidae. *See* Cattle
Bovid karyotype 204–210
Bovine, physical map of 320–321
Bovine, with Robertsonian translocation 488–490
Bovine albino locus 318–320
Bovine cystic fibrosis gene 490–492
Brachydanio rerio. *See* Zebrafish
Budorcas taxicolor. *See* Takin

C

Calico lines 26–27
Candystripe trait 23–29
Castanea dentata (Marsh.) Borkh. *See* American chestnut
Castanea mollissima Blume. *See* Chinese chestnut
Cat, alleles in 86–91, 139–142
Cattle 204–210
  GTB-banded chromosomes of 395–400
Ceratitis capitata. *See* Medfly
Ceratotherium simum. *See* White rhinoceros
Cervidae. *See* Mule deer
Chayote, cytogenetic study of 238–241
Chenopodium quinoa Willd. *See* Quinoa
Chick embryos, rDNA deficient 211–217
Chicken
  genetic linkage map of 79–85, 410–413
  phosphoglycerate kinase (PgK) gene 147–150
Chinese chestnut 440–446
Chlamydomonas, chloroplast genes in 366–376
Chloroplast
  biparental inheritance of 171–173
  DNA genes in *Chlamydomonas* 366–376
  inheritance in higher plants 347–354
Chlorotic seedlings 315
Chromosomes
  4p 147–150
  advanced pecorans 204–210
  coelacanth 322–325
  cotton 35–39
  mammal 455–465
  ovine 474–478
  synthesis of 247
  white rhinoceros 30–34
Citrullus lanatus (Thunb.). *See* Watermelon
CMS. *See* Cytoplasmic male sterility
Coelacanth, chromosomes of 322–325
Collinsia heterophylla, new variants of 314–318
Common bean
  margo seed coat color in 404–407
  nodulation mutants in 1–3
  purple pod character and complex *C* locus in 288–290
  RFLP analysis in interspecific hybrids 174–178
Computer programs
  to calculate distances of DNA sequences 64–66
  for drawing genetic linkage maps 66
  for estimating genetic contribution and coefficient of parentage 66–67
  for estimating number of nucleotide substitutions 493–494
  for Griffing's diallel analyses 336
  for multiple sequence alignment 417–418
  for population structure analyses 336–337
Connochaetes gnou. *See* Black wildebeest
Connochaetes taurinus. *See* Blue wildebeest
Coreopsis grandiflora. *See* Asteraceae
Cotton
  chromosomal variations in 35–39
  gene mapping in 152–157
Coturnix japonica. *See* Japanese quail
CR1 element 73–78
Crop evolution 191–195
Cucurbitaceae 238–241
Cultivated barley 451–454
Cystic fibrosis 490–492
Cytoplasmic male sterility (CMS) 233–238

D

Deafness, in pointer dogs 56–59
Deer mice, coat color genetics of 48–52
DIALLEL (computer program) 336
Diaphorase, in hexaploid oat 303–306
Diceros bicornis. *See* Black rhinoceros
Diploid alfalfa karyotype 18–22
Diptera 92–99

Connochaetes taurinus. *See* Blue wildebeest
Coreopsis grandiflora. *See* Asteraceae
Cotton
  chromosomal variations in 35–39
  gene mapping in 152–157
Coturnix japonica. *See* Japanese quail
CR1 element 73–78
Crop evolution 191–195
Cucurbitaceae 238–241
Cultivated barley 451–454
Cystic fibrosis 490–492
Cytoplasmic male sterility (CMS) 233–238

D

Deafness, in pointer dogs 56–59
Deer mice, coat color genetics of 48–52
DIALLEL (computer program) 336
Diaphorase, in hexaploid oat 303–306
Diceros bicornis. *See* Black rhinoceros
Diploid alfalfa karyotype 18–22
Diptera 92–99

DISTANCE (computer program) 64–66
DIVERGEN (computer program) 493–494
DNA
  biparental inheritance of chloroplast genome 171–173
  calculating distances of sequences 64–66
  chloroplast genes in 366–376
  estimating fragment lengths 151–152
  mapping polymorphisms, using PCR primers from avian CR1 element 73–78
  mitochondrial variation in *Drosophila* 421–426
  random amplified polymorphic 433–439
  RFLP analysis in interspecific hybrids 174–178
  rRNA gene 211–217
  See also Genetic linkage mapping
DrawMap (computer program) 66
Drosophila
  atlas of genes 495–497
  mitochondrial DNA variation in 421–426
Drosophila affinis 421–426
Drosophila athabasca 421–426
Drosophila melanogaster. See Flies
Drosophila simulans, fourth chromosome of 224–227
Drosophila subobscura 427–432
Dwarf1, in genetic mosaics 377–380

E

Ecology 68–69
Economics 68–69
Eptatretus stoutii. See Pacific hagfish
Eugenics 497–498
Eukaryotic nuclear genomes 355–356
Evolution 167, 419

F

Factor VIII gene 474–478
Fagus sylvatica (L.). *See* Beech nut seeds
Fap2 locus 160–162
Felis catus. See Cat
Field bean 487–488
FISH. *See* Fluorescence in situ hybridization
Flies
  average relative fitness for 325–327
  genome of 495
  new mutants and chromosome assignment 218–221
  parents' age effect on offspring 327–331
  P elements in 339–346
Fluorescence in situ hybridization (FISH) 147–150, 487–490
Forrest 484–486
Fourth chromosome, of *Drosophila simulans* 224–227
Frogs, chromosomes of ancient 322–325
Fusarium graminearum Schw. *See* Maize, ear rot

G

Gamete eliminator, in rice 310–312
GA plant growth regulators 377–380
Gekkonid lizard 255–260
Gender dimorphism 196–203
Gene number estimating, parental-type classification 105–111
GENESTRUT (computer program) 336–337
Genetic diversity
  cellular, individual, family, and population 248–249
  in Pacific yew 112–117
Genetic linkage mapping
  of apple 4–11
  bovine albino 318–320
  of chicken 79–85, 410–413
  computer program for 66
  of cotton 152–157
  disequilibrium in admixed populations 59–63
  in lentil 306–310
  of longleaf pine 433–439
  modular marker for apple 4–11
  mouse 167–168
  of ovine X-chromosome 474–478
  of rice 297–300
  in soybean 160–162, 300–303, 447–450
  in spider monkey 466–473
  in tepary bean 273–278
  See also DNA
Genetic mosaics, maize *Dwarf1* in 377–380
Genomes, relaxed and stringent 355–365
German national socialism 497–498
Giraffidae. *See* Masai giraffe
Glabrous stem 316
Glycine max (L.) Merr. *See* Soybean
Goat
  color inheritance of 267–272
  GTB-banded chromosomes of 395–400
Gonatodes taniae. See Reptile
Gossypium hirsutum L. *See* Cotton
Grapes 157–160
Griffing's diallel analyses 336
GTB-banded chromosomes, of cattle, sheep, and goats 395–400
Gynoecious mutants 316

H

Hexaploid oat, diaphorase and phosphoglucomutase in 303–306
Hordeum spontaneum. See Wild barley
Hordeum vulgare. See Cultivated barley
Humpback whales, group mortality among 52–54

I

Image analysis system 18–22
Inbred-backcross method, of gene number estimating 105–111
Inbreeding, depression rates in maize 122–128
Ipomoea batatas. See Sweetpotato
Ives, Philip T. 250–251

J

Japanese quail
  orange plumage color mutation in 54–56
  testes and brains of 136–139
Juglans regia L. *See* Walnut

K

Karyotypic analysis 18–22
Keelless mutants 316
Kitakomachi 447–450
Koganejiro 447–450

L

Latimeria chalumnae. See Coelacanth
Lectin genes 179–182
Lentil, genetic linkage mapping 306–310
Linkage mapping. *See* Genetic linkage mapping
Longleaf pine 433–439
Loxodonta africana. See African elephant
Lycopersicon cheesmanii. See Wild tomato

M

Maize
  Dwarf1 in genetic mosaics 377–380
  ear rot 118–121
  inbreeding depression rates in 122–128
  nucleolar competition in hybrid 407–410
  teosinte hybrid kernel weight 191–195
Male sterility
  in quinoa 231–233
  in sunflower 233–238
MALIGN (computer program) 417–418
Mammals, chromosomes of 455–465
Margo seed coat color, in common bean 404–407
Maroon upper lip 316
Masai giraffe 204–210
Medfly, hybrid dysgenesis in 92–99
Medicago sativa L. *See* Alfalfa
Megaptera novaeangliae. See Humpback whales
Megaselia scalaris. See Flies
Meloidogyne incognita. See Southern root-knot nematode
Mendel's laws 355–365
Messel fossils (Germany) 243–247
Mitochondrial DNA, in *Drosophila* 421–426

Mokara orchids, genomic and meiotic analysis of 39–43
Mouse, genetic linkage mapping 167–168
Mule deer 204–210
Multiple sequence alignment, computer program for 417–418
Muskox, relationship to sheep 143–147

N

Natural selection 70
in beech nut seedlings 183–190
Nazis 497–498
Nobel Prize, women in science 247–248
Norway rat, new color mutants in 142–143
Nuclear genomes 355–365
Nucleolar competition, in maize hybrid 407–410
Nucleotide substitutions 493–494

O

Oat 303–306
Orange plumage color mutation, in Japanese quail 54–56
Organelle nuclear genomes 356–364
Overo spotting, in paint horses 222–224
Ovibos moschatus. *See* Muskox
Ovine hemophilia A 474–478
Ovis aries. *See* Sheep

P

Pacific hagfish, chromosome elimination in 413–415
Pacific yew, genetic diversity in 112–117
Paint horses, overo spotting in 222–224
Parental-type classification, for inbred–backcross method of gene number estimating 105–111
Paspalum notatum. *See* Apomictic tetraploid
Pea
flowering in 12–17
lectin genes and mutations 179–182
mutants 129–133
Pelargoniums 349–350
P elements 339–346
Peromyscus maniculatus. *See* Deer mice
PgK gene. *See* Phosphoglycerate kinase (PgK) gene
Pgm7. *See Phosphoglucomutase7*
Phaseolus acutifolius A. Gray. *See* Tepary bean
Phaseolus vulgaris L. *See* Common bean
Phosphoglucomutase, in hexaploid oat 303–306
Phosphoglucomutase7 35–39
Phosphoglycerate kinase (PgK) gene 147–150
Photoperiod 12–17
Pinus palustris Mill. *See* Longleaf pine
Pisum sativum L. *See* Pea
Plastids 347–354
Plumage color mutation, in Japanese quail 54–56
Pointer dogs, deafness in 56–59
Pollen, in hexaploid sweetpotato 162–165
Polytene chromosomes, in anther tapetal cells of *Vigna unguiculata* (L.) Walp 43–46
Population structure analysis, computer program for 336–337
Population taboos 68–69
Prêto 146 289–290
Pronghorn 204–210
Pubescent stem 316
Puccinia hordei 451–454

Q

Quinoa, male sterility in 231–233

R

Racism 497–498
Random amplified polymorphic DNA (RAPD) 433–439
RAPD. *See* Random amplified polymorphic DNA
Rattus norvegicus. *See* Norway rat
Reptile, chromosomes of 255–260
Restriction fragment length polymorphism (RFLP) analysis
on interspecific hybrids 174–178
on ovine X-chromosome 474–478
RFLP. *See* Restriction fragment length polymorphism (RFLP) analysis
Rhizobium
lectin genes and 179–182
nodulation in 46–47
Ribosomal RNA (rRNA) gene 211–217
Rice
chromosome mapping of 297–300
gamete eliminator in 310–312
Rj2 locus 300–303
Rmd locus 300–303
Robertsonian rearrangements 458, 488–490
Rome Beauty apple 4–11
Royal Burgundy 289–290
Rps2 locus 300–303
rRNA gene. *See* Ribosomal RNA (rRna) gene

S

Salix eriocephala. *See* Willows
Salvage/turnover/repair (STOR) model 366–376
Science, women in 247–248
Sechium edule Sw. *See* Cucurbitaceae
Seedless grapes, stenospermocarpic inheritance in 157–160
Seedlings
beech nut 183–190
virescent 315
yellow-cotyledon mutant 241–242
Sex ratio, in *Silene latifolia* 196–203
Sheep
GTB-banded chromosomes of 395–400
hemophilia A in 474–478
muskox and takin relationship to 143–147
Silene latifolia. *See* Sex ratio
Silk, resistance to infection 118–121
Silver grain distribution 475
Snyder's ratios 331–335
Socialism 497–498
Solanum chacoense 241–242
Sorghum bicolor. *See* Sorghum lines
Sorghum lines 23–29
South African wildebeest 479–483
Southern blot analysis 475–476
Southern root-knot nematode 484–486
Soybean
genetic linkage 160–162, 300–303, 447–450
southern root-knot nematode in 484–486
Spider monkey 466–473
STOR. *See* Salvage/turnover/repair (STOR) model
Sunflower 316–318
male sterility in 233–238
Sweetpotato, unreduced pollen in hexaploid 162–165

T

Takin, relationship to sheep 143–147
Taxus brevifolia Nutt. *See* Pacific yew
Teosinte, maize hybrid kernel weight 191–195
Tepary bean, genetic linkage 273–278
Tephritidae 92–99
Terminal lobe 315
Theobroma cacao L., allozyme diversity in 291–295
Thuja plicata. *See* Western red cedar
Tomato 401–404
Transgenic techniques 168
Transposable genetic elements 339–346
Triticum aestivum. *See* Wheat
Tubular leaf 315

U

UPGMA2 (computer program) 336–337

V

Vicilin genes 487–488
Vigna unguiculata (L.) Walp, polytene chromosomes in 43–46
Virescent seedlings 315
Vitis vinifera L. *See* Seedless grapes

W

Walnut, genetics of 389–394
Watermelon, male-sterile mutant in 279–285
Western red cedar, mixed mating in 227–230
Wheat
  leaf pubescence in 286–288
  preharvest sprouting tolerance in 312–314
White Angel apple 4–11
White rhinoceros, diploid chromosome numbers in 30–34
Whitetail deer 204–210
Wild barley 451–454
Wild tomato, beta carotene in 401–404
Willows, inheritance of isozymes in 381–388
Women, in science 247–248

Y

y-cs. See Candystripe trait
Yellow-cotyledon seedling mutant 241–242
Yellow leaf 315–316

Z

Zebrafish, fin length in 415–416

Title Index

A

Allozyme diversity in a germplasm collection of *Theobroma cacao* L. 291–295

Analysis of the autonomy of maize *Dwarf1* action in genetic mosaics 377–380

Assignment of brain-specific protein η amino chain and microsatellites ILSTS001 and ILSTS011 to the bovine physical map 320–321

An atlas of Drosophila *genes: sequences and molecular features* (book review) 495–497

An autosomal genetic linkage map of the chicken 79–85

B

Balding: a new mutation on mouse chromosome 18 causing hair loss and immunological defects 134–136

B_{III} progeny ($2n + n$) from apomictic *Paspalum notatum* obtained through early pollination 295–297

Biparental inheritance of the chloroplast genome in *Coreopsis* (Asteraceae) 171–173

C

The candystripe locus, *y-cs*, determines mutable pigmentation of the sorghum leaf, flower, and pericarp 23–29

Carrier detection of ovine hemophilia A using an RFLP marker, and mapping of the factor VIII gene on the ovine X-chromosome 474–478

Chromosomal location of lectin genes indicates they are not the basis of *Rhizobium* strain specificity mutations identified in pea (*Pisum sativum* L.) 179–182

Chromosomal location of *Phosphoglucomutase7* locus in *Gossypium hirsutum* 35–39

Chromosomal location of some marker genes in rice using the primary trisomics 297–300

Chromosome conservation among the advanced pecorans and determination of the primitive bovid karyotype 204–210

Chromosome elimination in northeast Pacific hagfish, *Eptatretus stoutii* (Cyclostomata, Agnatha) 413–415

Chromosomes–a synthesis (book review) 247

The chromosomes of the living coelacanth and their remarkable similarity to those of one of the most ancient frogs 322–325

Coat color genetics of *Peromyscus*: IV. Variable white, a new dominant mutation in the deer mouse 48–52

Colonization of America by *Drosophila subobscura*: the founder event and a rapid expansion 427–432

A comparison of G-band patterns of the muskox and takin and their evolutionary relationship to sheep 143–147

A comparison of [^{125}I]iodomelatonin binding sites in testes and brains of heavy meat-type Japanese quail with a randombred strain 136–139

A cytogenetic study of six cultivars of the chayote, *Sechium edule* Sw. (Cucurbitaceae) 238–241

Cytological evidence for nucleolar competition in a maize hybrid 407–410

Cytological expression in the male-sterile *ms* mutant in watermelon 279–285

Cytoplasmic male sterility in sunflower: origin, inheritance, and frequency in natural populations 233–238

D

Diploid chromosome number and chromosomal variation in the white rhinoceros (*Ceratotherium simum*) 30–34

DISTANCE: a program to calculate distances and other parameters of an alignment of DNA sequences 64–66

Dominant inheritance of overo spotting in paint horses 222–224

DrawMap: a computer program for drawing genetic linkage maps 66

E

Effects of rRNA gene copy number and nucleolar variation on early development: inhibition of gastrulation in rDNA-deficient chick embryos 211–217

Effects of the fourth chromosome on the sterility of hybrids between *Drosophila simulans* and its relatives 224–227

Effects of the parents' age on the level of polymorphism at the *Adh* locus in *Drosophila melanogaster*: I. Effects on the genic and genotypic segregation of the offspring 327–331

Estimating the extent of natural selection in seedlings from different *Fagus sylvatica* (L.) populations: application of new measures 183–190

Evaluation of parental-type classification for the inbred-backcross method of estimating gene number 105–111

Evidence for a gene for silk resistance to *Fusarium graminearum* Schw. ear rot of maize 118–121

Evolutionary dynamics of sex ratio and gender dimorphism in *Silene latifolia*: I. Environmental effects 196–203

The evolutionary history of the *P* family of transposable elements 339–346

Evolution: collected writings of H. Paterson (book review) 419

The evolution of nodulation in Rhizobium: altruism in the rhizosphere 46–47

Evolution of number and morphology of mammalian chromosomes 455–465

An extraordinarily low diploid chromosome number in the reptile *Gonatodes taniae* (Squamata, Gekkonidae) 255–260

F

The *Fap2* locus in soybean maps to linkage group D 160–162

Fin length inheritance in *Brachydanio rerio* 415–416

Flowering in *Pisum*: a further gene con-

trolling response to photoperiod 12–17
FORTRAN programs for analyzing population structure from multilocus genotypic data 336–337

G

Gamete eliminator adjacent to the *wx* locus as revealed by pollen analysis in rice 310–312
A gene for resistance to the southern root-knot nematode in soybean 484–486
Gene mapping in lentil with recombinant inbred lines 306–310
Gene mapping in the spider monkey (*Ateles paniscus chamek*) 466–473
Genetic and linkage analysis of low temperature-induced browning in soybean seed coats 447–450
Genetic control of diaphorase and phosphoglucomutase isozyme variants in hexaploid oat 303–306
Genetic divergence in South African wildebeest: analysis of allozyme variability 479–483
Genetic diversity, differentiation, and inbreeding in Pacific yew from British Columbia 112–117
Genetic impact of an unusual group mortality among humpback whales 52–54
Genetic linkage between isozyme, morphological, and DNA markers in tepary bean 273–278
A genetic linkage map of longleaf pine (*Pinus palustris* Mill.) based on random amplified polymorphic DNAs 433–439
Genetics of cellular, individual, family, and population variability (book review) 248–249
The genome of Drosophila melanogaster (book review) 495
Genomic and meiotic analysis of Mokara orchids 39–43

H

High-resolution GTG-banded chromosomes of cattle, sheep, and goat: a comparative study 395–400
Hybrid dysgenesis-like phenomena in the medfly, *Ceratitis capitata* (Diptera, Tephritidae) 92–99

I

Inbreeding depression rates in maize populations before and after recurrent selection 122–128
Inheritance of a lethal yellow-cotyledon seedling mutant in *Solanum chacoense* Bitt. 241–242
Inheritance of beta carotene content in the wild tomato species *Lycopersicon cheesmanii* 401–404
Inheritance of eleven new variants of *Collinsia heterophylla* 314–318
Inheritance of goat coat colors 267–272
Inheritance of isozymes in *Salix eriocephala* Michx. 381–388
Inheritance of juvenile leaf and stem morphological traits in crosses of Chinese and American chestnut 440–446
Inheritance of kernel weight in two maize-teosinte hybrid populations: implications for crop evolution 191–195
Inheritance of leaf pubescence in diploid wheat 286–288
Inheritance of non-nodulation and ineffective nodulation mutants in common bean (*Phaseolus vulgaris* L.) 1–3
Inheritance of preharvest sprouting tolerance in *Triticum aestivum* and its transfer to an amber-grained cultivar 312–314
Inheritance of resistance to *Puccinia hordei* in cultivated and wild barley 451–454
Inheritance of stenospermocarpic seedlessness in *Vitis vinifera* L. 157–160
Inherited deafness among nervous pointer dogs 56–59
Integration of *Rps2, Rmd,* and *Rj2* into linkage group J of the soybean molecular map 300–303
Interactive BASIC program for Griffing's Diallel analyses 336

L

Linkage disequilibrium in admixed populations: applications in gene mapping 59–63
Living within limits: ecology, economics, and population taboos (book review) 68–69
Localization and mapping of the Le_1 and Gl_2 loci of cotton (*Gossypium hirsutum* L.) 152–157
Localization of the chicken PgK gene to chromosome 4p by fluorescence in situ hybridization 147–150
Localization of vicilin genes on field bean chromosome II by fluorescent in situ hybridization 487–488
Locally associated alleles of cat coat genes 86–91

M

MALIGN: a multiple sequence alignment program 417–418
Mapping DNA polymorphisms using PCR primers derived from the sequence of an avian CR 1 element 73–78
Mapping the bovine albino locus 318–320
Mapping the bovine homolog of the human cystic fibrosis gene 490–492
The margo (*mar*) seed coat character and the *t mar* interaction in common bean 404–407
Messel: an insight into the history of life and of the earth (book review) 243–247
Mink and pearl: new color mutants in the Norway rat 142–143
Minute fragment observed in a bovine pedigree with Robertsonian translocation 488–490
Mitochondrial DNA variation among the *Drosophila athabasca* semispecies and *Drosophila affinis* 421–426
Mixed mating in an experimental population of western red cedar, *Thuja plicata* 227–231
Molecular marker linkage map for apple 4–11
Morphological integration and genetic variability in *Juglans regia* L. 389–394
Mutant allele frequencies in domestic cat populations in Austria 139–142

N

Natural selection: domains, levels, and challenges (book review) 70
The Nazi connection: eugenics, American racism, and German national socialism (book review) 497–498
New microsatellite markers on the linkage map of the chicken genome 410–413
New mutants and their chromosome assignment in the fly *Megaselia scalaris* 218–221
Nobel Prize women in science: their lives, struggles and momentous discoveries (book review) 247–248
Non-nodulating mutants of *Pisum sativum* (L.) cv. Sparkle 129–133
Nuclear controls of chloroplast inheritance in higher plants 347–354

O

Occurrence of polytene chromosomes in the anther tapetum of *Vigna unguiculata* (L.) Walp 43–46
Orange: a plumage color mutation accompanied by semi-lethality in Japanese quail 54–56

P

Philip T. Ives (in memoriam) 250–251
Program for estimating relative genetic contribution and coefficient of parentage 66–67
Program for estimating the number of nucleotide substitutions using different methods 493–494

R

A recessive gene determining male sterility in quinoa 231–233

Relaxed and stringent genomes: why cytoplasmic genes don't obey Mendel's laws 355–365

RFLP analysis of preferential transmission in interspecific hybrids of *Phaseolus vulgaris* and *P. coccineus* 174–178

S

The salvage/turnover/repair (STOR) model for uniparental inheritance in *Chlamydomonas*: DNA as a source of sustenance 366–376

Science as a way of knowing: the foundations of modern biology (book review) 69

Snyder's ratios with incomplete penetrance 331–335

Steps toward life: a perspective on evolution (book review) 167

Structure and history of African elephant populations: I. Eastern and southern Africa 100–104

Substantial genetic variation in southern African black rhinoceros (*Diceros bicornis*) 261–266

T

Techniques for the genetic analysis of brain and behavior: focus on the mouse (techniques in the behavioral and neural sciences, volume 8) (book review) 167–168

Tight linkage of purple pod character and the complex *C* locus in common bean 288–290

Transgenic techniques, principles and protocols (book review) 168

U

Unreduced pollen in hexaploid sweetpotato (*Ipomoea batatas*) 162–166

Use of an image analysis system to karyotype diploid alfalfa (*Medicago sativa* L.) 18–22

Using average relative fitness ($\bar{W}$) for intergroup comparisons: a caution 325–327

W

Weighted least squares estimation of DNA fragment lengths 151–152
